Allowable Subject Matter

Claims 1-12 are allowed.

Reason for Allowability

The following is an examiner's statement of reasons for allowance: the primary reason for the allowance is the including, in combination with other limitations recited in the claims, the following features:

a terminal insertion hole (48) to which a terminal connected to a brush is insertable, the terminal insertion hole being provided in a feed connector integrally formed with the brush holder;

a rising wall (73) disposed in a rear side of the terminal insertion hole in the brush holder; and the terminal (46) arranged and constructed to overcome the rising wall (73) in accordance with an elastic deformation with respect to an upper surface of the rising wall, being insertable into the terminal insertion hole (48), and

the terminal is being prevented from unintentional disassembly (see 62A-62B in fig. 7) on the basis of abutment of a base end portion (72) of the terminal against the rising wall, wherein the terminal is provided with an elastic deforming performance regulating portion (75).

Comparing to the prior-art of the record, none of the prior art references of the record, either stand-alone or in combination, has taught or suggest the terminal with the features of the base end portion (72) of the terminal against the brush holder's rising wall and being abutted and prevented from unintentional disassembly, and the terminal having an elastic deforming performance regulating portion, in combination with other limitations recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
